Steam Support

Hello hakimjurimi

You may want to self-lock your account so that no changes can be made until you regain access.

Locked features will include purchasing, changing password, changing email, Trading, Community Market, and playing on VAC enabled servers.

LQCXT7Y   **Save this code.**
You will need it to unlock your account later.

Print it out, save the URL to revisit later, or simply write the code down.

Be cautious about emailing the code. If your email is compromised you may be giving an attacker access to unlock your account.
